

My Portable Convection Heaters

These type of portable heaters are very common and easy to use but they do come with risks.

We recommend that before you purchase and start using, you familiar yourself with the guidance we have provided below.

For safety reasons please read and adhere to the following before and during use:

- Before use, always refer to the manufacturer's instructions on safe use and safe practices when using the appliance.
- Never cover the heaters vents, always ensure airflow • Always keep the heater a safe distance from other items
- Keep children and pets a safe distance away as these items are hot and could burn in use
- Position on a flat stable surface when using
- Never leave appliance unattended
- Always switch off and unplug when not in use
